Practice without boundaries

CureMD ICE

The Big Picture

Ian Walker

What is Population Health Management?

“An endeavor which utilizes individual, organizational and cultural interventions to help improve the morbidity patterns of defined populations.”

Replacing “*i*” with “*we*”

- Reactive Vs Proactive
- Single Patient Focus Vs Population
- Fee-for-Service Vs Fee-for-Performance/Value
- Provider Centric Vs Patient Centric

weLLNESS

SHIFTING THE FOCUS

Why the shift?

Inadequate disease management

Increasing healthcare costs

Increased health disparities

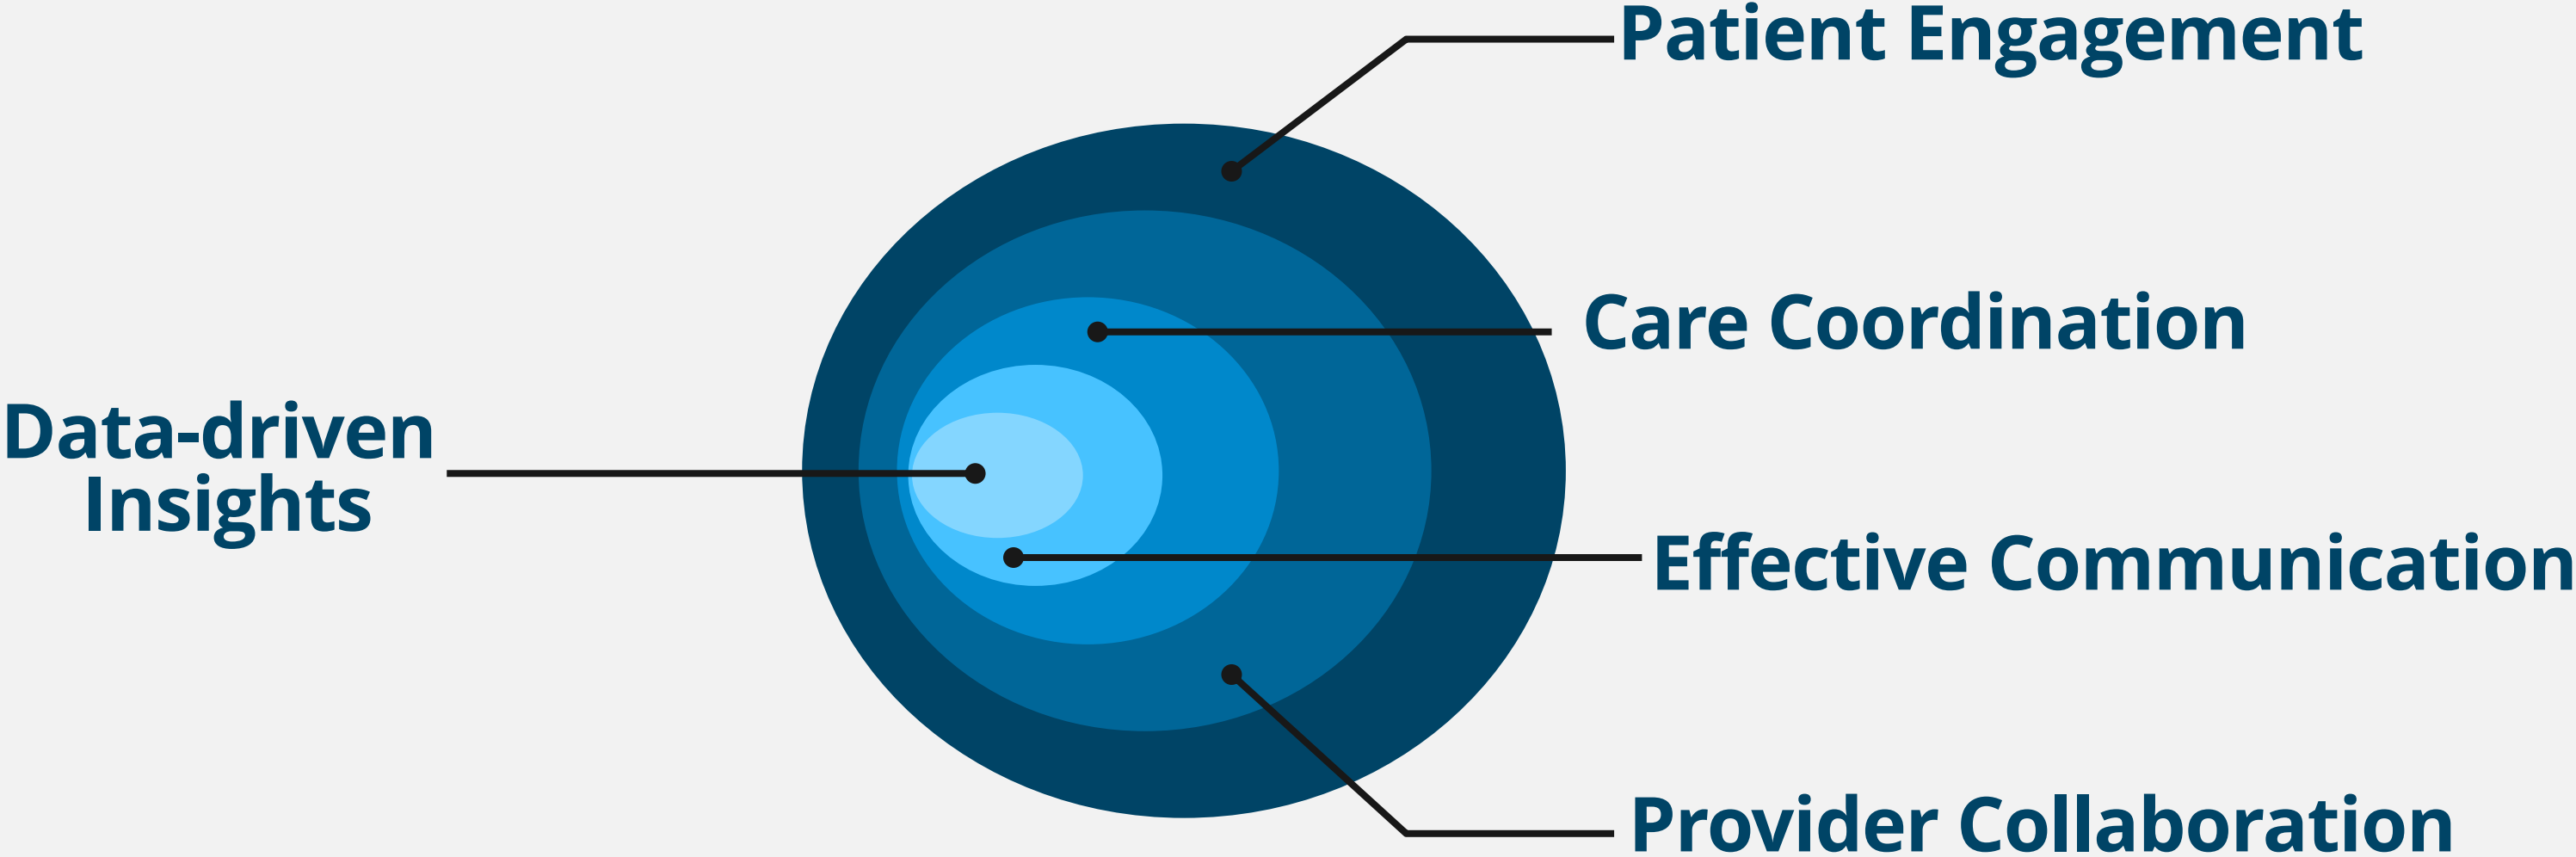

Reduced care
quality

Major Influences

Analytical insights enabling better
outcomes...
