Clinical Overview:
Synchronize historical encounter information for swift decision making.

Physical Exam:
Quick, accurate and comprehensive documentation for problem focused Physical Examinations.

Features

- Problems & Complaints
- History (Present Illness, Family, Social, Medical)
- Vitals
- Review of Systems
- Physical Exam (Inspection, Palpation, Auscaltation)
- Electronic Prescriptions (CPOE)
- Lab Interfaces
- Document Imaging
- Clinical Knowledge Base
- Clinical Decision Support System (CDSS)
- Device Interoperability
- Workflow Editor
- Auto Note
- Follow-up/ Recall Tracking
- Patient Education
- Electronic Signature
- Fax Capability
- Voice Recognition
- Trending & Graphing

Integrated Modules

- Patient Profile
- Enterprise Scheduling
- Eligibility Verification
- Intelligent Billing
- Workflow Management
- E&M Coding Optimization
- Enterprise Messaging
- Calendar, Email & Reminders
- Notes & Task Management
- Audit Trail & Access Control
- Cure Patient Portal
- Data Mining Reports

CureMD EMR – Beyond Paperless Practice

CureMD Electronic Medical Records is a easy to use, browser based, feature rich, CCHIT certified solution designed to empower care providers of the internet age.

CureMD EMR supports continuity of care management through innovative tools that adapt to your unique workflow and clinical approach. Specialty specific, template driven, point and click technology accurately documents patient encounters and transactions faster then ever before. By eliminating redundant data entry, CureMD helps minimize errors, improve quality, patient safety and efficiency.

CureMD EMR delivers knowledge when and where required through integrated knowledge base, decision support system, evidence based best practices, clinical guidelines and alerting system. Rich functionalities spanning over forty modules and sub-systems directly connect with pharmacies, labs and devices to deliver instant and complete access to all the information you need, when you need it.

CureMD EMR simplifies decision making, streamlines operations and ensures compliance to industry standards and best practices, ultimately saving time and effort to maximize value and returns.

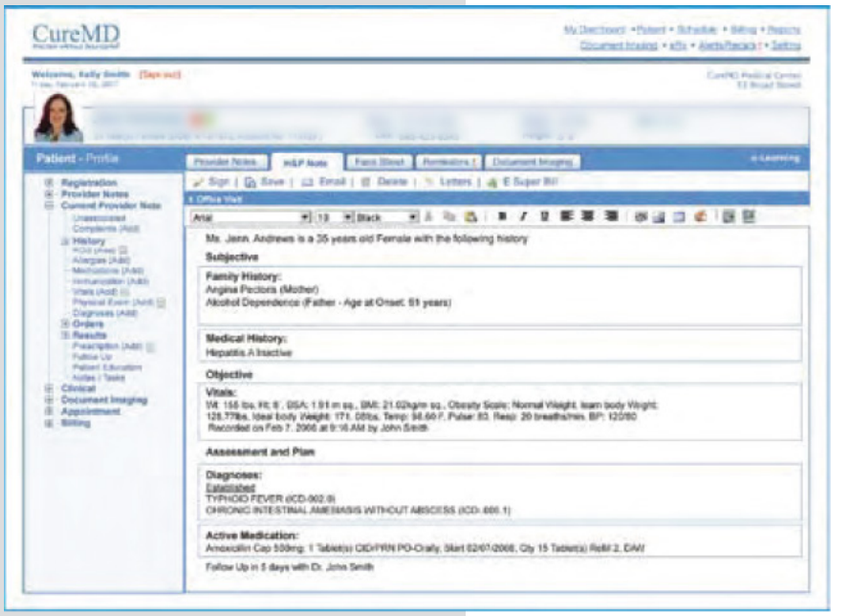

Benefits

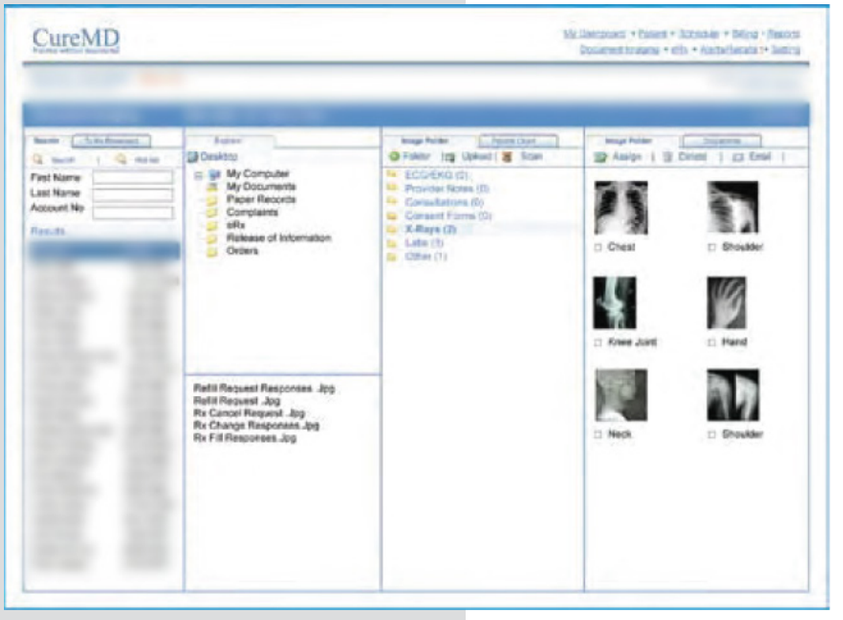

- Increase Revenue
- Reduce Costs
- Decrease Risks
- Enhance Quality
- Information Availability
- Enhance Productivity
- Ensure Compliance
- Higher User Adaptability

Specialty Knowledge Base

- Allergy
- Ambulatory Surgery
- Cardiology
- Clinical Neurophysiology
- Dermatology
- Endocrinology
- Emergency Medicine
- Family Practice
- Gastroenterology
- General Surgery
- Geriatrics
- Hand Surgery
- Home Care
- Internal Medicine
- Infectious Diseases
- Neurology
- Nutrition
- Nursing
- OB/GYN
- Occupational Therapy
- Ophthalmology
- Oncology
- Orthopedics
- Otolaryngology
- Pain Management
- Pediatrics
- Physical Therapy
- Podiatry
- Psychiatry
- Pulmonary
- Rehabilitative Medicine
- Rheumatology
- Speech Therapy
- Sleep
- Urology
- Vascular Surgery
- Employee Care

Auto Note:
Automatically populate encounter information in your pre-defined format.

Document Imaging
Capture, scan and attach paper charts, clinical images, photographs, x-rays and medical drawings directly into the electronic chart.

Workflow Editor

Configurable specialty workflow and process editor assembles component templates, data forms and knowledgebase to allow adaptation of your unique preferences, style and priority.

Auto Note

Creating component based encounter documentation is no longer a lengthy process. Simply point and click the required information for quick and accurate data capturing in your predefined format.

Clinical Overview

Providing longitudinal summary of patient history, trends and alerts on a single screen.

Computerized Physician Order Entry (CPOE)

Electronic orders and results management for prescriptions, labs, procedures and radiology.

Patient Education

Promote patient wellness programs through preventive care advisories, care instructions and guidelines.

E&M Coding Optimization

Maximize payments and eliminate missed charges through automatic service level calculations and direct charge entry.

With CureMD EMR, you can;

Document patient encounters faster with personalized workflows, templates and built-in knowledgebase/ decision support.

Eliminate paper by consolidating information into electronic charts. Add digital images, consultation letters, patient files, insurance IDs, consent forms and more.

Deliver preventive care, disease management, drug information and patient education services.

Develop patient and condition-specific treatment plans.

Utilize structured data for reporting and researching patient information.

Electronically transmit and receive lab orders. Simplify decisions with automated flagging of abnormal results, analyze track and trend results.

Minimize Adverse Drug Events (ADE's), fax, e-mail and electronically transmit prescriptions and refill requests.

Create patient and population level clinical reminders based on age, gender and medical conditions. Link diagnoses, procedures and medications with reminders for automated health maintenance alerts.

Manage referrals and electronically transmit consultation letters to referring providers. Automatically generate recall and follow-up letters.

Decrease account receivables with electronic billing, clean claim checks, electronic data interchange (EDI) and financial management tools.

Analyze population-wide disease patterns and service utilization with advanced data mining reports.

Engage patients and referring providers through the integrated, self-service patient portal. Ensure privacy, track user activity and control information access with comprehensive audit trail and release of information management.

Standards

CureMD utilizes broadly accepted standards that promote compatibility and secure information exchange between patients, practices, providers, payers, labs, pharmacies and devices.

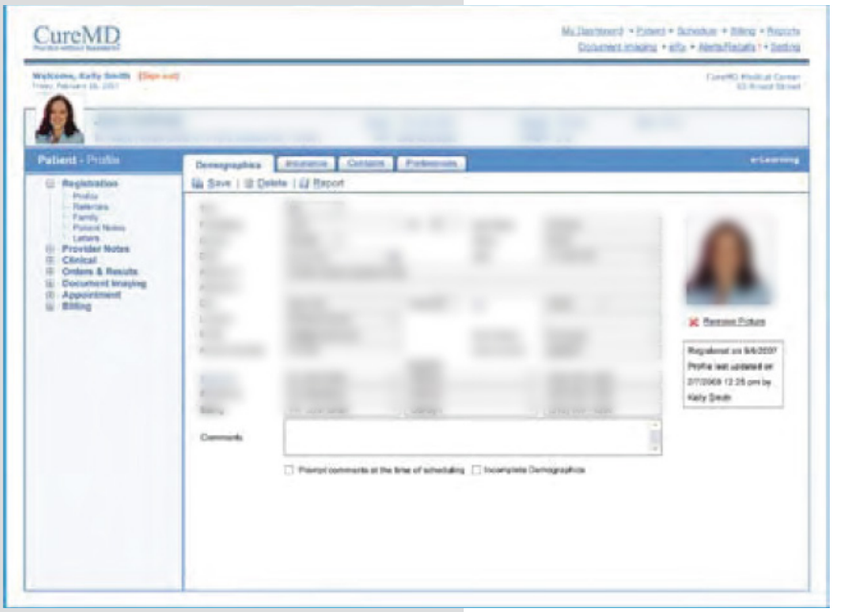

Supported Standards

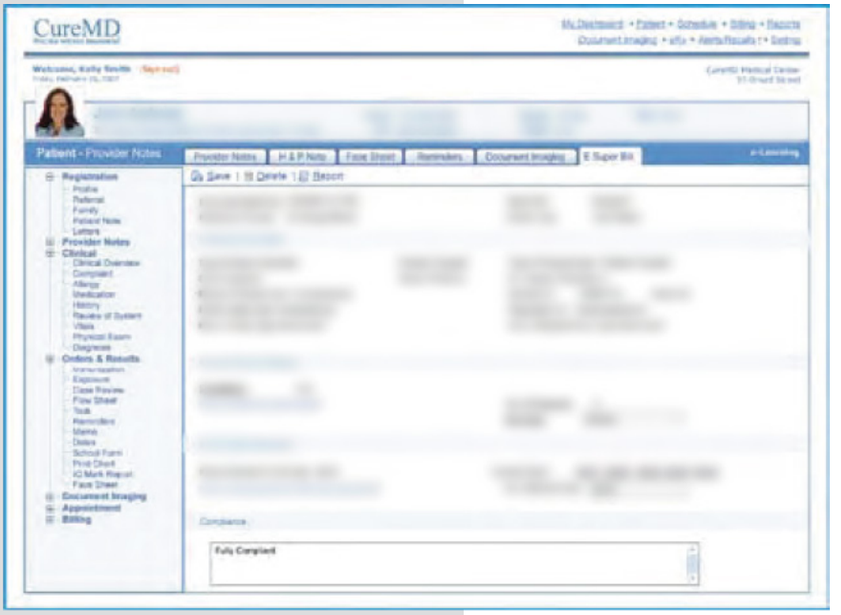

- HL7
- ANSI X12
- LOINC
- SNOMED CT
- DICOM
- NCPDP

Certifications

- CCHIT
- HIPAA
- SureScripts®
- ISO 9001:2000

Patient Profile:
Delivering administrative, clinical and financial information via a single seamless interface.

E&M Coding Optimization:
Bridging EMR with billing; eliminating missed charges, ensuring compliance and accurate service level billing.

Features

- Patient Profile
- Enterprise Scheduling
- Eligibility Verification
- Intelligent Billing
- Clean Claim Checks
- Electronic Super Bill
- Electronic Data Interchange
- Electronic Remittance Advice (ERA)
- Right Remit™ Denial Management
- Referral Management
- Key Performance Indicators KPIs (Dashboard)
- Enterprise Messaging
- Calendar, Email & Reminders
- Notes & Task Management
- Data Mining Reports
- Patient Statement Cycling
- Audit Trail & Access Control

Integrated Modules

- Electronic Medical Records
- Document Imaging
- E&M Coding Optimization
- Follow up/Recall Tracking
- Pay for Performance / PQRI
- Reimbursement Management
- Collections
- Payment Plan
- Status Check In & Check Out
- Patient Portal
- Practice Web Portal
- Fax Capability
- e-Learning

CureMD Enterprise Practice Management

CureMD EPM is a web based enterprise practice management solution designed to meet the broadest possible range of a modern practice's administrative, communication and fiscal management needs.

CureMD provides integrated access across patient demographics, scheduling, electronic medical billing, administrative/financial reporting and workflow management; connecting front and back office operations, improving productivity and reducing A/R delays.

Powerful functionalities and flexible architecture make CureMD your No.1 choice for automating your business processes and reducing unnecessary overheads. User-friendly interface and point-and-click workflow expedites transaction speed and service quality.

The system is integrated with CCHIT certified electronic medical records, patient portal, pay for performance guidelines and workflow management tools to help consolidate information, eliminate paper, optimize efficiency and accelerate revenues.

Whether your goal is to enhance the value of services to your patients, increase reimbursements or simply stay ahead of the technology curve, CureMD can empower your practice with the flexibility and outreach it needs to succeed in the internet age.

Benefits

- Increase Patient Volume
- Enhance Productivity
- Minimize Claim Rejections
- Eliminate Errors
- Expedite Payments
- Reduce Denials
- Ensure Compliance
- Improve Customer Satisfaction

Usability

CureMD's healthcare value chain is accessible anywhere, anytime. Browser-based, point & click technology, crisp clean interfaces and problem focused workflows deliver a true user friendly solution.

Architecture

CureMD combines proven technologies and industry standards to help ensure your infrastructure remains:

- Secure
- Scalable
- Always Available

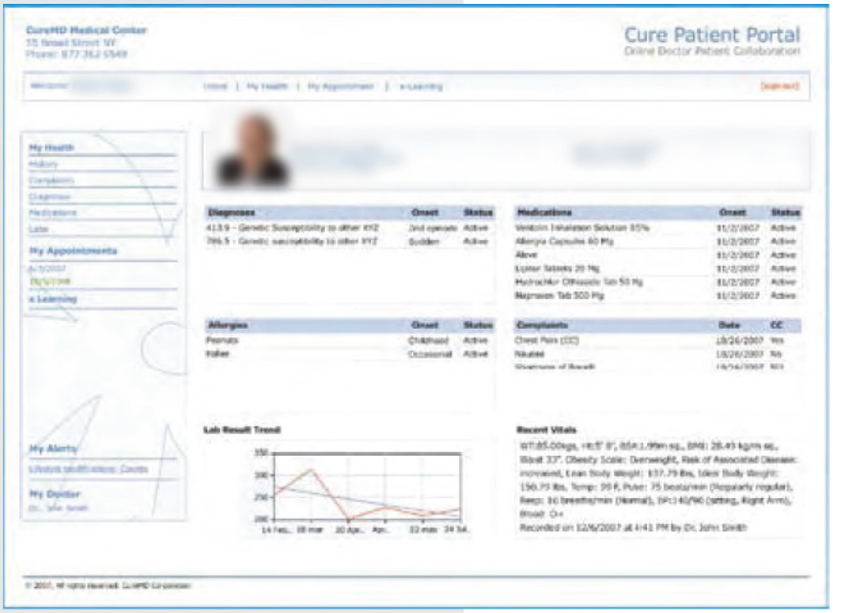

Security & Privacy

CureMD supports multiple security standards to keep your information secure, private and accessible.

- Access Authorization
- Role Based Access Control
- Release of Information
- Activity Monitoring
- Audit Trail
- 128 Bit SSL Encryption
- Digital Signatures

Personalized Dashboard:
Presenting service utilization trends and patterns; financial forecasting, tasks, messages, and user defined key performance indicators.

Cure Patient Portal:
Connect with your patients. Save time by capturing subjective information even before the visit.

Personalized Dashboards

User defined dashboards graphically display your Key Performance Indicators (KPIs).

Administration Alerts & Reminders

Automatically generate alerts, reminders and recalls while tagging your patients.

Right Remit™

Optimize insurance remittance through built-in comparison reports of your contractual and remitted amounts.

Cure Patient Portal

Facilitate your patients to securely request appointments and refills online, receive test results as they become available, utilize educational material and update their health status, history, demographics and insurance information while subscribing to valuable electronic services.

Practice Web Portal

Your practice domain on the internet. Create new opportunities, build practice awareness and deliver a wealth of information and electronic services to your patients and beyond.

Education - Training and Support

CureMD e-Learning portal offers a range of flexible training and support programs while providing instant access to your dedicated CureMD Account Manager.

Practice Management Modules

Patient Profile

Include useful patient specific biographical, historical and administrative information for focused, timely and well informed decision making. Increase patient volume, enhance efficiency and maximize profitability.

Enterprise Scheduling

A single, seamless interface optimizes resource utilization and appointment management across multiple locations, physicians, nurses and equipment. Eliminate duplicate data entry, improve communication and conserve valuable staff time.

Intelligent Billing

Provides innovative functionalities for eligibility verification, automatic charge capture, clean claim checks, electronic claim submission, electronic payment posting, denial management and financial reporting to help you reduce errors and maximize revenue.

Workflow Management

Integrated workflow Management adapts to your preferences and practice style, enabling you to truly personalize CureMD. The system is flexible enough to mirror your existing processes and innovative enough to revitalize them through powerful collaboration tools.

Electronic Communication

Electronically communicate with your patients, participating providers and staff. Assign tasks, reminders and notes to users within your practice. Associate patients with tasks, signify follow-up dates and allocate responsibilities to staff.

Data Mining Reports

Acquire 360 degree view of your entire organization; turn your data into decisions. Get empowered with the information you need for quick and well informed decision making. Flexible search options consolidate information into electronic or paper formats; create printable color reports exportable to MS word, MS Excel, Rich Text and PDF format.

CureMobile™
Healthcare on the Move!

Fully integrated with the CureMD platform, CureMobile™ keeps you informed by instantly delivering information from EMR, Practice Management, Scheduling, Billing and beyond. Eliminate the chance for medical error, improve quality and patient satisfaction.

Information Architecture

Information has been organized and grouped in a meaningful format for easy to drive navigation across the entire system. User centric interface improves aesthetics and acceptance, resulting in effort reduction and cost effective transaction processing.

> For patient safety, quality, security and interoperability CureMD supported initiatives include:
>
> - HIPAA
> - Leapfrog
> - DOQ-IT
> - QualityNet
> - NCQA
> - JCAHO
> - HEDIS

Dedicated Billing Manager

99%
Customer Retention Rate

Outsourcing your medical billing will increase your reimbursements since a dedicated billing service is more efficient, effective and experienced at medical billing than your own office. Our knowledge, ability, and dedicated follow-up is why, our average adjustment rate is consistently lower, usually well below 10%. Our billing specialists achieve A/R rates that are much higher then the industry average. Simply put, you and your practice will get a higher average return per processed claim.

Our goal is to provide the highest return on your claims without sacrificing service or patient support. We successfully convert medical services into cash reimbursements by:

- Generating and accelerating individual claims which are professionally prepared, accurately coded and electronically submitted.
- Persistent follow-up on all claims.
- Creation and mailing of patient statements.
- Prompt posting of payments.
- Collection and analysis of practice performance.
- Analysis of monthly statistical reports track business activity and productivity.

When you outsource your revenue cycle management to CureMD, you can expect the following results.

- Improved payment speed, decreasing Days in Account Receivable. Our billing specialists typically get over 90% of your cash within 10 days.
- All your claims will be filed within 1 day of us receiving the super bill/ charge slips.
- Less than 5 percent of your claims will ever be denied.
- Denied claims will be appealed within 3 days, provided the physician responds rapidly to our requests for details.
- Software system is continually updated to reflect most current coding & reimbursement rules.

CureMD services are executed with precision and effectiveness, so instead of merely surviving, your healthcare enterprise truly thrives with new efficiencies, improved service quality and increased profitability.

Our state-of-the-art billing system daily generates your claims, which are accurately coded and electronically submitted. Once your superbills are processed, payment can be received in as little as 7 days, not the usual three months.

- Increased cash flow.
- Faster collections.
- Substantially reduce collection cycle.
- More efficient operation of office staff.

DRT - Discrete Reportable Transcription

According to research by the New England Journal of Medicine and the AC group; after 20 years of EMR initiation, full adaptation of EMR has barely reached 4 %. Experts agree that other then cost, the real reason of low EMR adoption is the unavailability of crucial historical data.

According to research, 90% patients at specialty practices come back for second or third visit, and with the EMR having no data, doctors have to type everything from scratch; spending much more time and effort.

EMR can be very effective with historical data that allows trending, analysis, quality reporting, PQRI etc. To be successful, you have to have a fully populated EMR when you want to start using it for charting.

DRT is the world's first and only overnight transcription service that directly places completed notes in your pre-designated, fully customized templates as part of your CureMD EMR/ PM solution.

Eliminate change, practice the way you do every day by turning your dictation into Discrete Reportable Data fully populated in your EMR/ PM.

Client Success

"I was nervous initially, adjusting to Electronic Medical Records as I had moved up from paper charts but hats off to the CureMD team that trained me with unlimited zeal and helped me everyday to learn the system. It was a wonderful experience."

Dr. Arun Patel - The Brooklyn Hospital, New York

"CureMD staff is extremely friendly and they always seem to understand me exactly. I only wish my patients were the same."

Dr. Thomas Sanderson - Sanderson Medical Center

> “It has never been easier to profit from CureMD; accessible anywhere, anytime. A low monthly fee covers software, training, support and regular updates.”

More Opportunities
More Collaboration, More Transactions

CureMD is built on industry standard Microsoft® .NET platform, utilizes industry standard relational data base and Windows OS; providing enterprise-class reliability, security and scalability.

Software as a Service

CureMD is hosted as a subscription service and provided to customers across the Internet. By eliminating the need to install and run the application on the customer's own computer, SaaS alleviates the customer's burden of software maintenance, ongoing operations and support. SaaS also reduce up-front expense of software purchases, through less costly, on-demand pricing.

Practices requiring a secure high performance solution with minimal investment can depend on CureMD SaaS version. CureMD’s robust infrastructure empowers organizations with round the clock access, hassle free management, free upgrades, disaster recovery and remote backups.

Enterprise Version

CureMD application framework is also available for enterprise installations with custom content and re useable components to provide unprecedented flexibility and customization opportunities.

Locally Installed (Client Server)

Organizations needing to maintain a large database onsite may opt to host CureMD in-house. Doing so allows for broader customization, control and manageability over the infrastructure.

Seamless Solution

Whichever CureMD solution you choose (SaaS, Enterprise or Client Server); you get the entire platform of integrated features, free upgrades and reliable support.

Implementation and Training

New CureMD clients experience smooth transition and start-up through hands-on training, embedded IT services and data migration.

Data Migration

With years of data migration experience, our team is highly qualified to handle this vital piece of the implementation process. With CureMD, your practice moves on, but only your problems get left behind.

Support and Maintenance

CureCare is our suite of top quality support and training services, available online, onsite and over the phone. Dedicated support is available 24 hours a day, seven days a week.

Compliance & Alliances

CureMD is the leading provider of innovative health information management solutions that transform the administrative and clinical operations of healthcare organizations.

CureMD's revolutionary technology simplifies clinical decision making, streamlines operations, and ensures compliance to industry standards and best practices. Ultimately saving time and effort to maximize value and returns.
