

**CureMD**

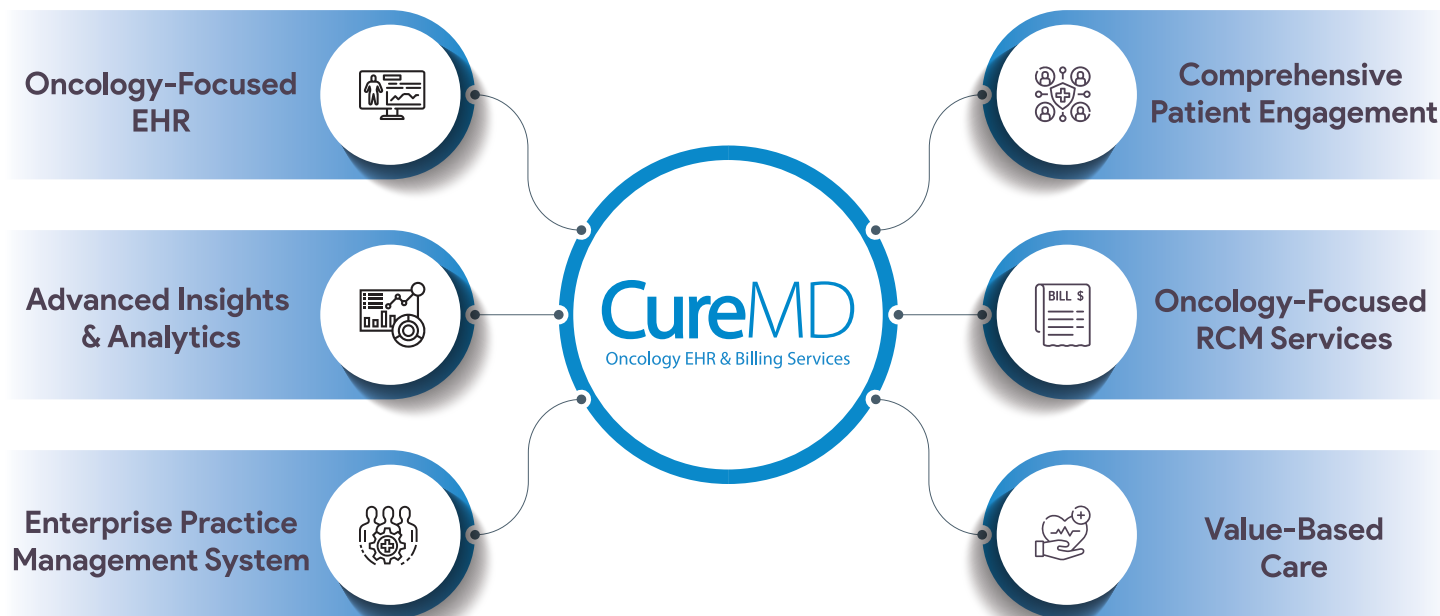

**All-in-One Oncology EHR**

**Practice Management | Billing Services**

# Transform Your Clinical and Administrative Operations

With CureMD's comprehensive end-to-end treatment and billing capabilities, simplify decision-making and ensure seamless workflows at the point of care.

The award winning platform delivers complete information and evidence based knowledge when and where required. This facilitates informed and effective decision making to improve quality of care, practice performance and patient experience.

“CureMD has transformed my practice completely by automating chemotherapy management, reducing the risk of lost charges by automatic charge capture, and managing inventory through its Drug Forecasting module. With lower reimbursement rates every year, CureMD has helped me bill correctly and increase my annual collections by 20%. Overall, the EHR is user friendly and I would recommend it to all Community Oncology Practices.”

*Dr. Shazia Zafar*

South West Florida Cancer Care

# Advancing Medical Oncology

CureMD's award-winning cloud platform integrates NCCN chemo templates with citations, supportive care agents, dose parameters and safety instructions into tailored treatment plans. Our extended integration with NCCN eliminates the need for manual order preparation. NCCN Flash Updates are immediately incorporated into actionable care plans, bringing the most current protocols directly into your workflow.

Through Gen5 our ASCO CancerLinQ certification delivers real-time quality tracking using evidence based care to benchmark outcomes against clinical measures.

- ✓ Customizable plan of care
- ✓ Embedded decision support
- ✓ Trial drug management
- ✓ Automated dosage calculation
- ✓ Provider note templates
- ✓ Integrated charge capture
- ✓ Interactive, activity-based flow sheets
- ✓ Advanced analytics
- ✓ NCCN powered chemo regimen library
- ✓ Safety alerts
- ✓ NCI's CTCAE adverse event documentation
- ✓ Drug utilization forecasting
- ✓ Drug cabinet & in-office lab integration
- ✓ ONS compliant MAR documentation
- ✓ Gold certified e-prescribing
- ✓ PACS / DICOM imaging

## Manage all of your Treatment Planning Needs in a Single View

Our interactive flowsheet provides a complete timeline of your patient's treatment – including past, present and future events. Plan and modify treatment orders and patient-specific activity directly in the EHR and share with scheduling staff in one easy click.

## Advanced Treatment Planning

The treatment planner seamlessly manages entire chemo cycles. Intuitively schedule treatment plans and parallel therapies to keep track of current cycles as well as skipped or rescheduled treatment days.

## Drug Management

Drug profiles ensure patient safety with customized rules for dose capping, rounding, maximum daily and lifetime dose tracking. Drug profiles auto-select pre-meds and IV solutions for easy order management.

## NCCN Powered Regimen Library

Focus on patient care. Our unique FHIR interface with NCCN brings the most current protocols and updates directly into your workflow. The system offers a complete library of NCCN-chemotherapy templates with actual built-in orders. Clinicians can easily utilize evidence based protocols and bring the latest clinical research into the treatment workflow.

### **Drug Preparation and Administration**

Assisted chemo preparation with drug cabinet interfaces, automated volume and wastage calculations.

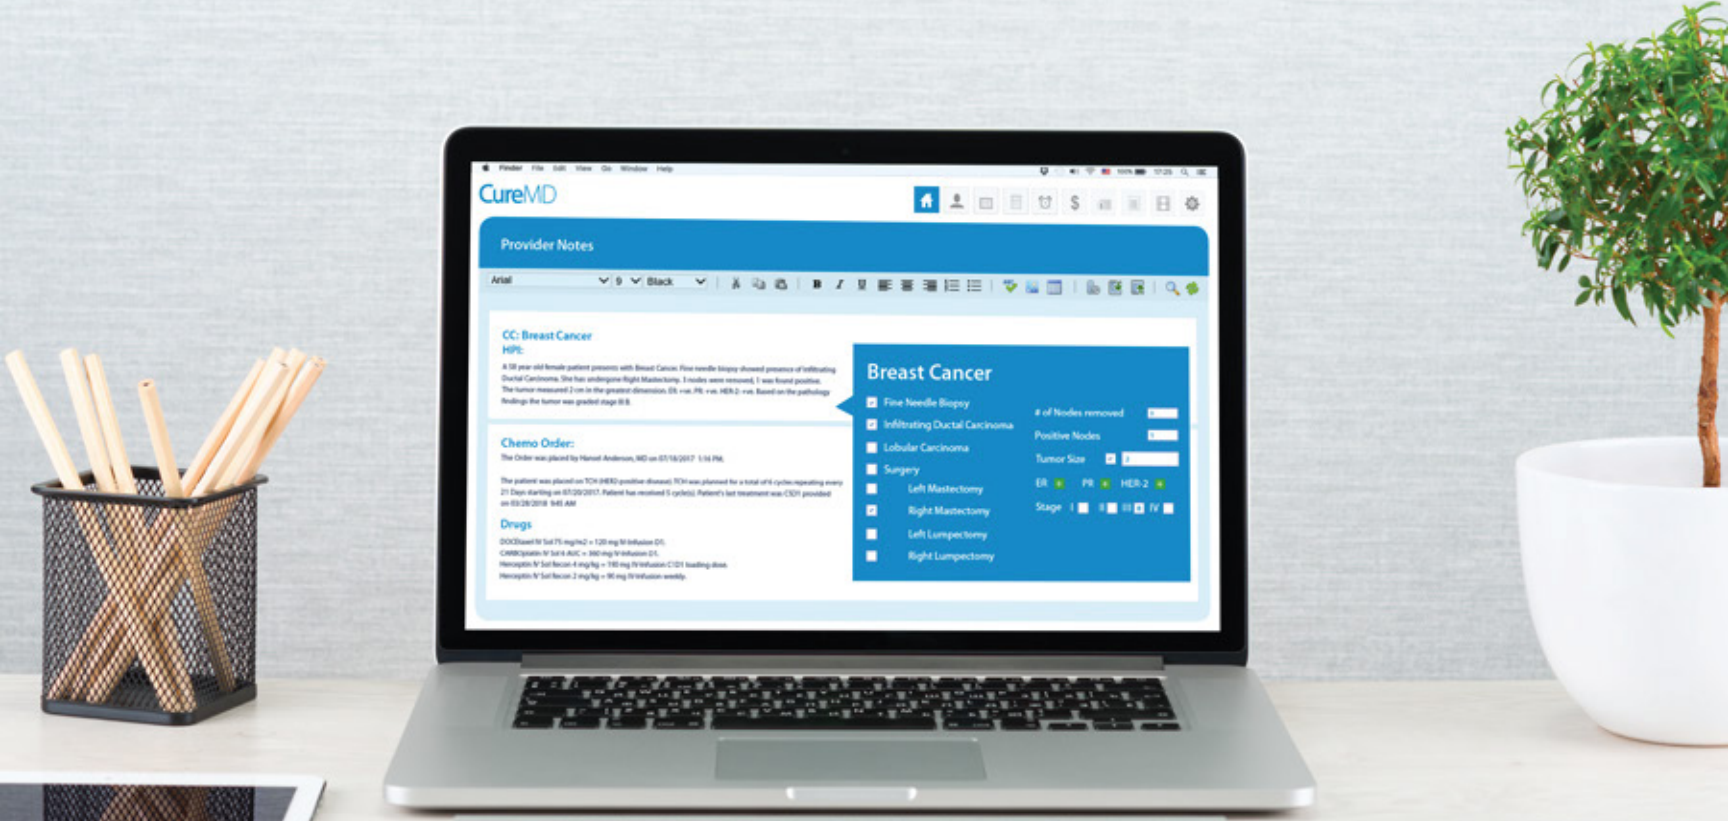

### **Nursing Documentation**

Comply with ONS standards by recording performance scales, adverse events and IV site documentation.

### **Automatic Charge Capture**

Billing information is captured from drug administration documentation. The system generates a complete claim.

## Provider Note

Speed up patient visits with pre-defined workflow templates to quickly and accurately document the entire patient encounter. Customizable templates ensure care quality with rich oncology content, order sets, and customizable flow sheets.

Coding tools such as the E&M calculator improve charge capture efficiency and boost revenue. Templates generate fully customizable, beautifully formatted notes that can be instantly printed or faxed to referring providers. Compatibility with speech recognition tools such as Dragon Medical speeds up documentation time while reducing manual data entry.

# Practice Management System

## **Synchronize Your Operations**

Integrated with our EHR and billing solutions, seamlessly connect your front and back end operations, remove communication barriers, and streamline the flow of information across departments.

## **Powerful Personalization Specific to Your Needs**

Our platform learns from your unique styles and practice preferences to facilitate effortless documentation and transaction speeds. Manage daily tasks through our personalized dashboards that provide ongoing visibility into every aspect of your practice operations.

“On the oncology module, [CureMD] is able to capture dosing information and NDC numbers the cabinet and pulls that information directly into the practice management system, which is really important for our billing.”

**Elham Abbasi, MD**  
**North Houston Cancer Clinics**

# Empower Everyone in Your Practice.

## **Oncology-Specific Charge Capture Automation**

Automate charge capture workflows from your clinical to billing teams in real-time so you never miss a charge and ensure compliant reimbursement.

## **Convenient Patient Payments**

Collect payments and co-pays with up-to-date patient balances, easy-to-use check-in screens, and automated email and text reminders.

## **Integrated Messaging and Assigned Task Reminders**

Instantly facilitate communication with users, administrators, and patients with our integrated messaging system. Create tasks that can be assigned across roles and send reminders to the right person at the right time.

## **Built-in Insurance Eligibility Verification**

Our eligibility verification tool allows for real-time eligibility verification and prompt prior authorization through our in-house clearinghouse to minimize delays and eliminate inefficiencies.

# Revenue Cycle Management

Give your billing team the tools to solve today's complex revenue cycle challenges, Whether you use our cloud-based EHR or an alternative, we can integrate and eliminate revenue leakages and optimize revenue collection by streamlining your entire workflow, from eligibility and check-in to copay collection and the entire back office.

Regardless of the size of your organization, our certified medical billing specialists will enhance service quality by allowing you to focus on your patients and leave all aspects of billing to us.

Our integrated billing and practice management with robust analytics and reporting, will repair revenue leakage, save time and empower decision making.

“ We have been using CureMD for the past few years and it has improved our productivity greatly. It’s easy to learn for new employees. We love the function of the EHR where we can send patient reminders without requiring personnel involvement. We also use the built-in tasks management in the EHR which helps us manage patient care in a timely manner. We also like the powerful financial reporting to help us keep track of our A/R and collections. The oncology module is fantastic. We like the pre-built regimens as well as the ability to enter our own regimens in the oncology module. The charge capture is also great and makes it easy for our billing department to send out claims quickly. ”

*Ann Ke*

Practice Manager  
Cancer and Blood Specialty Clinic

## More than just billing software

With over 20 years of experience, we deeply understand the nuances of navigating the complexities of the oncology billing ecosystem. Our dedicated team of experts can handle your entire billing processes, from claim creation and submission to follow-ups, denial management, electronic remittance advice (ERA), payment posting and reporting.

## Streamline your billing operations

Capture charges at the point of care, manage claims submissions and scrubbing with our own clearing house to facilitate quicker reimbursement with our automated billing software.
