

Whether at a private practice or hospital, physicians can easily save time and increase efficiency by utilizing a medical practice management software. The figure below demonstrates a typical doctor's daily responsibilities with and without the implementation of a practice management software (PMS).

## PMS BASED PRACTICE

**Collect** patient information

Access billing history

Enables doctors to view appointments

Access full visit records

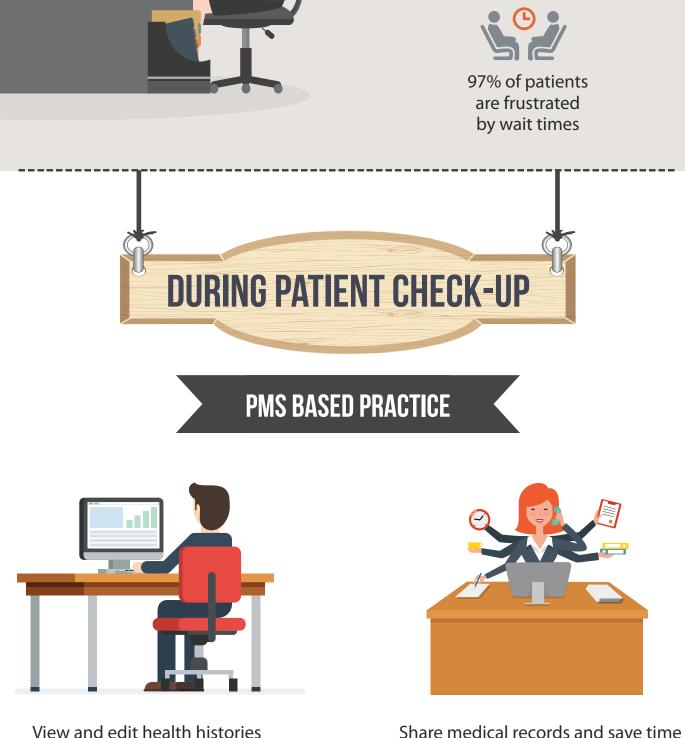

Set appointment reminders

## **PAPER BASED PRACTICE**

Doctors spend days, weeks, or months each year on paperwork instead of patients

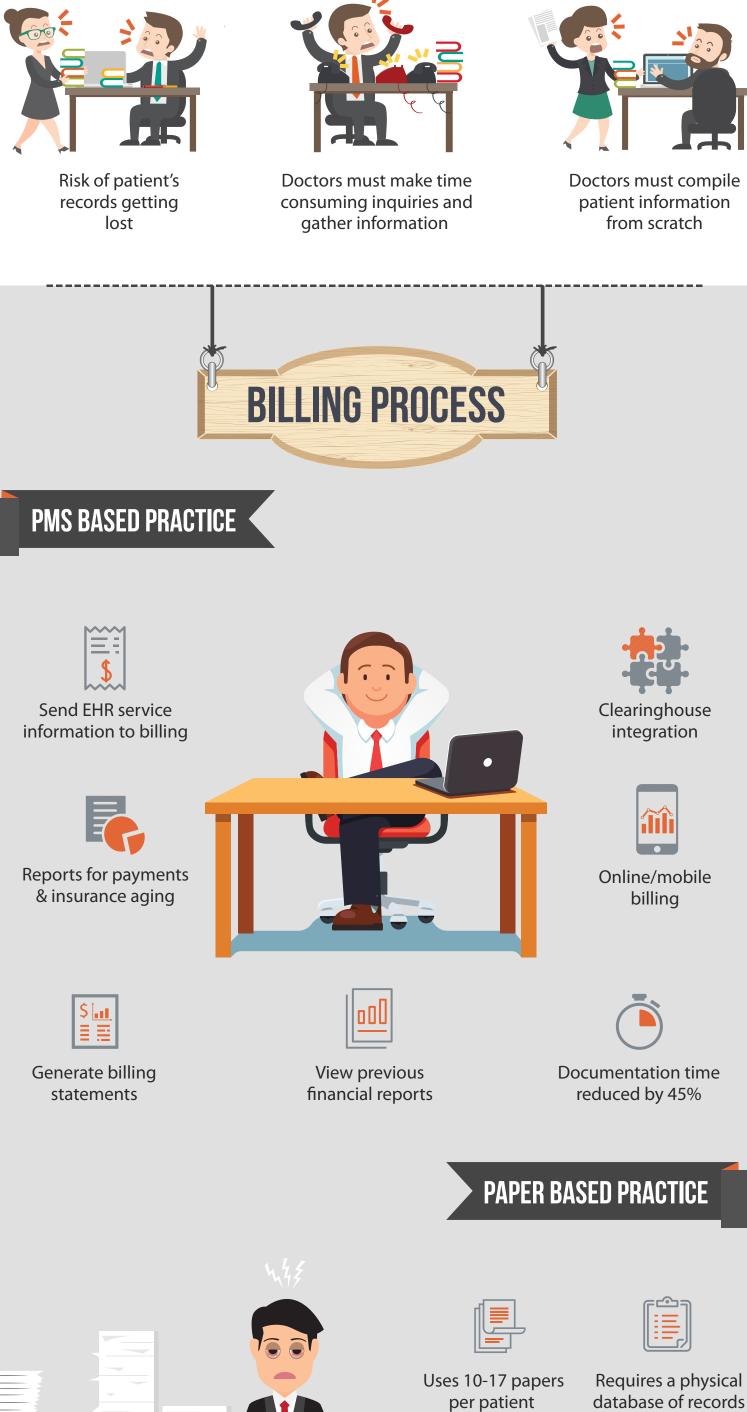

Create customized health plans

**PAPER BASED PRACTICE** 

Separate file bindings for each patient

1-2 hours to complete billing documents for each patient

## **PMS BASED PRACTICE**

Gross patient & insurance collections

Request prescription refills

**Productivity matrices** 

Easily view notes and test results

Insurance reports

## **PAPER BASED PRACTICE**

Physicians work 5 to 8 additional hours (per week?) on prescribing

Manual shipping authorizations

Lost paper prescriptions prevent continuation of patient treatments
